

## Food Contact Declaration

### Intent of Evaluation

An evaluation of Tefen PVDF Fittings Raw Materials was conducted to determine the 21 CFR compliance to current FDA regulations of the ingredients that comprise this food contact product.

### Scope of Evaluation

The PVDF raw materials are used to produce various shapes of fittings, pump parts, and valve parts under the following conditions:

- For all food types
- For repeated use
- For a temperature up to 120°C (248°F)

### Conclusion of the PVDF evaluation to US FDA 21CFR

NSF International has reviewed each ingredient in the formulator against the requirements of U.S. FDA 21 CFR.

Based on the 21 CFR review, it has been determined that the product as submitted would be compliant to FDA 21 CFR regulations for repeated use with all food types of food contact temperature of up to 120°C (248°F)

This declaration is based on NSF Test Reports No. DB00936-8
