About TEFEN

Tefen Flow and Dosing Technologies is a manufacturer of fittings and flow products, with more than 50 years of experience in product development. Tefen designs, manufactures & sells a wide range of flow products.

Tefen fittings are simple to use and require no special tools to enable reliable leak-free connection.

Our products serve a broad spectrum of international market sectors such as automation, pneumatics, hydraulics, food industry, medical device, and other industrial applications, and are also used for the agriculture industry.

Tefen customers rely on innovative products and solutions that provide uncompromising connections, outstanding performance, unmatched reliability and long service life. Our application-specific solutions create value for our customers and provide them with competitive advantage.

Tefen is dedicated to quality and customer service and satisfaction customers all over the world.

Tefen is certified for ISO 9001:2015 and we meet international standards.

ISO 9001
2015 certified

Food Contact
FDA 21 CFR

Food Contact
(EU) 1935/2004

Affirming Tefen's dedication to public health, these prestigious stamps of approval serve as further evidence that our PVDF products meet stringent and superior standards.

NSF/ANSI 61

We are pleased to continually evolve and offer you the high-level, high-quality, and safe products you are looking for.

1 - Bad 2 - Medium 3 - Good

Note: Notice tube dimension differ between industries.
Fittings' dimensions refer to tube ID or OD, with respect to the common application.

Use thread seal tape

Minimum straight tube segment

MAINTENANCE

Tefen's fittings require minimum maintenance. Nevertheless, a visual periodic inspection is recommended. If damage or abbrasion is spotted, please replace the fitting, and make sure it fits the application.

When the temperature is below 4°C, we recommend draining the system if there is no flow in it, to avoid severe damage and leaks caused by the freezing water.

DISCLAIMER

All technical data is based on theoretical values and experiments held in Tefen's laboratory.

The information in this catalog is for reference only. Please consult our representatives for further details and advice.

Tefen is constantly seeking ways to improve the specifications of its products.

Whilst every effort is made to produce up-to-date literature, this catalog should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular product. Prospective purchasers of the products from Tefen should satisfy themselves at the time they place the order as to the suitability of the products for the particular application. We have the right to alter specification without prior notice

PVDF Fittings

Polyvinylidene fluoride (PVDF) is a renowned engineering polymer renowned for its exceptional mechanical properties, chemical resistance, and thermal advantages. Moreover, it exhibits remarkable stability, retaining these advantages even when subjected to UV, radioactive, and gamma radiation exposure.

Tefen's PVDF is a high-quality virgin material that is certified for use with drinking water (NSF) and in food applications (FDA), withstanding temperatures of up to 120°C.

It finds widespread application in industries such as petrochemicals, semiconductors, water distillation, pharmaceuticals, and food processing.

TIGHT PUSH

Tefen tight push fittings are mechanical compression fittings that can operate with plastic tubes in the range between $\frac{3}{16}$ "- $\frac{1}{2}$ ", 4-120mm.

The fittings sealing mechanism is based on an external NBR oring that seals the tube around it's Outside Diameter.

This type of mechanism, ensures a full bore passage, for low pressure loss, as well as smooth and uninterrupted internal flow of liquids and air.

BARB BLOCK

Tefen barb Block fittings are mechanical PUSH-ON compression fittings that can operate with numerous types of plastic tubes in the range between ¼"-½", 6-12mm. The fittings sealing mechanism is based on a barb and tightening nut.

How to use: Insert the nut onto the tube, insert the tube onto the barb and then secure the nut tightly on the barb support thread.

Main use: connection of plastic tubes of hydraulic and pneumatic systems.

Main Advantages: high chemical resistant, durable resistant for tube pullout, no rubber seals – long service life without leaks.

Color Coding

Nut for Union Connector: X stands for the color of the nut.

1	White
2	Black
6	Red
8	Blue
9	Yellow

BARB CONNECTORS

Tefen barb connectors designed to operate with all PE tubes class 2.5-4 PN, at the range.

Can work with other flexible plastic and rubber pipes.

The Fittings and sealing mechanism are based on a barb that holds the tube from the inside diameter.

Fittings size indicate the nominal outside diameter of the tube.

For example: $\frac{5}{8}$ " barb fitting, fits a $\frac{5}{8}$ " irrigation tube class 2.5, with inner diameter of $\frac{1}{2}$ ".

For black
Polypropylene only

HOSE FITTINGS

Tefen hose fittings are the perfect choice to connect all types of flexible rubber and plastic tubes in domestic, industrial and all other general applications.

Main advantages:

- Strong and durable, high impact resistant, all sizes are true outside diameter of the fittings, and will match Nylon 6-6 inside diameter of the tube. In order to secure tube on the fitting barb, it is recommended to use Tefen's snap clip or similar metal or plastic clip.
- How to use: push the tube onto the barb all the way to the stopper.
- Secure the tube tightly with a proper size snap clip.

QUICK RELEASE

The special quick connector offers a fast and reliable push-to-connect mechanism. The outer sleeve locks the plug into the socket.

When the plug is disconnected, the socket acts as a shut-off valve.

A variety of plugs can be connected and used, suitable for hydraulic or pneumatic systems.

Fittings' dimensions refer to tube ID or OD, with respect to the common application.

The Tefen snap clips are the simple and fast solution for securing flexible hoses and tubes on any barb fittings.

How to use:

Insert the snap clip onto the tube on place, and give it a manual press to ensure snug joint. Use a plier for final tightening.

How to release:

Apply lateral pressure to unlock it.

Main advantages: Strong, Durable, Reusable, reasonable price.

VALVES

Tefen's valves are suitable for various applications. They are resistant to high pressure and chemicals, work in a wide range of temperatures, improved grinding and discrepancies. They are designed for flexibility, efficiency and reliability.

Valve Release / Drain Valve

Product code	Thread BSPT	Color
22273008002	1/2"	☒ Black
22273108002	1/2"	☐ Black

Valve release: Valve installed vertically upwards on the highest point. Functions as Anti-Vacuum (syphon) valve (CAT. No. 22273008002).
Drain Valve with stainless spring. Valve installed at pipe end. For automatic drainage of condensed water in compressed-air lines, after shut-off of compressed air

Spraying & Fogging Nozzles

Tefen spray and fogging nozzles are designed for various applications.

They are ideal for adding humidity and cooling for livestock applications, vegetable and industrial refrigerators

- Fan Nozzles: straight wetting pattern.
- Connection: Flange configuration.
- Conical spray nozzles: round hollow wetting pattern.
- Connection: Flange configuration.
- Conical spray nozzle with 1/8" NPT male thread: give a round hollow wetting pattern.
- Non Drip nozzle: allow to hold the fluid pressure at 0.3 [bar] for fast and short operation and prevent fluid dripping.
- Finger filter: will give extra protection for each nozzle small articles in the system to prevent clogging.
- Adjustable nozzle: design for domestic use, fits with Tefen spray guns.
- Nozzle filter: designed to fit Tefen nozzle holders. Filter screen= 100 mesh/ /140 micron.
- Misting unit: Designed with 2 adjustable arms, to hold 2 flange nozzles specially designed for vitrine fruit & vegetables supermarket refrigerators.
- 1/8" short finger filter: Designed for small hydraulic loops on agriculture and industrial application. Filter screen= 100 mesh/ /149 micron.
- 1/4" long finger filter: designed for an integral filtration of hydraulic control valves. Filter screen= 100 mesh/ /149 micron.
